- 3. In the event Arthur and Verile Smith fail to complete on their proposed purchase, Council authorize the sale of the southerly half of the closed road allowance to Island Berry Company Ltd. for residential market value."

DISTRICT OF SAANICH MINUTES OF THE COMMITTEE OF THE WHOLE MEETING HELD IN THE COUNCIL CHAMBERS SAANICH MUNICIPAL HALL, 770 VERNON AVENUE <u>MONDAY, JUNE 25, 2012 AT 7:57 PM</u>

Present: Chair: Councillor Murdock

- **Council:** Mayor Leonard, Councillors Brice, Brownoff, Derman, Gerrard, Sanders, Wade and Wergeland
- Staff: Paul Murray, Administrator; Colin Doyle, Director of Engineering; Sharon Hvozdanski, Director of Planning; Carrie MacPhee, Director of Legislative Services; Donna Dupas, Legislative Manager; and Maura Jones, Senior Committee Clerk

2870-302531 SINCLAIR ROAD - REZONING APPLICATION - BRAD CUNNINSinclair RoadLAND SURVEYING

Report of the Director of Planning dated April 23, 2012 recommending Council approve the rezoning from RS-10 to RS-6; and that a covenant be registered prior to final reading to secure construction of dwellings on proposed Lots 1 and 2 to meet or exceed a construction standard equivalent to Built Green[™] Silver, to prohibit the siting of any dwelling on proposed Lots 1 and 2 within 10.5 m of Sinclair Road, and prohibit the siting of any dwelling within 2.0 m of the westerly side lot line of proposed Lot 1 and within 2.0 m of the easterly side lot line of proposed Lot 2.

The applicant, Mr. B. Cunnin made a presentation to Council, highlighting the following:

- Size and topography of the existing lot;
- Size and zoning of the surrounding properties;
- Proposed RS-6 zoning will result in 2 smaller dwellings instead of 1 large dwelling;
- No variances are requested;
- Canvassed neighbouring residents initially in 2011 and again within the last 2 weeks;
- Available residents expressed support for the proposal, indicating it could reduce issues with rental properties in the area;
- Cadboro Bay Residents Association was generally appreciative of the application at the initial consultation in 2011;
- Increased setbacks and size restrictions of RS-6 were in response to initial consultation with the residents association;
- At a later meeting, the residents association changed their decision regarding the project and were not willing to engage in further discussion;
- Comparison of existing and proposed lot configuration;
- Potential streetscape; and
- Owner willing to undertake covenants proposed in the report by the Director of Planning.

In response to questions from Council, Mr. Cunnin stated:

- If the application proceeds to Public Hearing, consideration will be given to the relocation and reuse of the existing dwelling; the proponent is also willing to covenant the construction to a Built Green Gold standard.
- There is a bare land strata development near the subject property. The lots in this development are zoned RS-10 and are 780 square metres in size.
- The 2 trees located on the eastern property line are the only trees that will be affected by the development. The protected trees on the boulevard and at the rear of the property will not be impacted.
- The existing driveway on the subject property will be reused.
- It will be the responsibility of an arborist to ensure that the trees on the adjacent lot to the west are not damaged by construction.
- Other than increasing the setbacks to 2 metres, there are no further plans at this time to address protection of the tree root zones.
- This area has an eclectic mix of house designs and the increased setbacks will restrict the building envelopes. It is not the owner's intention to further constrain the shape and character of the future dwellings on the proposed subdivision.
- The slope of the property and Saanich's average grade calculation make it unlikely that future dwellings on the subject property would exceed 1.5 storeys in height.
- The slope of the area ensures that the viewscape of the neighbouring property to the west will not be impacted by future dwellings on the subject property.

PUBLIC INPUT

Nil

MOTION MOVED by Mayor Leonard and Seconded by Councillor Gerrard: "That a Public Hearing be called to further consider the rezoning application on Parcel A (DD 393550 I) of Lot B, Section 44, Victoria District, Plan 2081 (2531 Sinclair Road)."

Councillor Sanders stated:

- She is concerned that the proposed rezoning could set a precedent, given that many properties in the area are zoned RS-10.
- No conceptual house designs are provided for the future dwellings on the subject property.

Councillor Derman stated:

- As noted by the applicant, there are limitations to the potential height of future dwellings on the subject property and the architectural style of the area is eclectic.
- No concerns have been expressed regarding the proposal by the neighbouring residents.
- The applicant agreed that if the proposal proceeded to Public Hearing consideration will be given to the relocation and reuse of the existing dwelling and that the construction will be to a Built Green Gold standard.

Councillor Gerrard stated:

- If the application proceeds to Public Hearing, he hopes to hear from the neighbouring residents.
- The applicant has relaxed the front yard setback and no variances have been requested.
- This is a larger site than many neighbouring properties and will not set a precedent. He would prefer that there be 2 smaller dwellings on the subject property rather than 1 large dwelling.

Councillor Brice stated:

- This is a relatively modest infill request in a village area.
- The subject property is larger than the surrounding properties.
- The proposal could be easily absorbed into the existing community and will add to the housing stock.

Councillor Brownoff stated:

- The Public Hearing process will provide more notification to the community. Any opposition to the project is likely to be expressed at the Public Hearing.
- She would like reassurance at the Public Hearing from the applicant that there will be no additional impact on the trees as a result of future construction.

Councillor Wergeland stated:

- He would like to see the maximum height determined for any future dwellings on the subject property.
- It is understandable that the future owners would wish to determine the design of the future dwellings.

Councillor Murdock stated:

- He acknowledges the correspondence from the Cadboro Bay Residents Association.
- As noted in the report of the Director of Planning, consideration of an application cannot be delayed to await the outcome of a land use study.

The Motion was then Put and CARRIED

1970-302011 ANNUAL REPORT2011 Annual ReportAnnual Report for Council consideration.

The Administrator stated:

- Sustainability continues to be the vision for the Official Community Plan, the Strategic Plan and the Annual Report. In this context, sustainability means a balance between environmental integrity, social well-being, and economic vibrancy.
- The balanced scorecard approach to strategic planning as used in the annual report has 4 perspectives: citizen focus; financial stability; effective internal processes; and continued employee learning and growth.

- In 2011, Saanich moved forward on 39 planned initiatives, which is a slight increase from previous years. Delays occurred on 17 planned initiatives.
- The draft annual report has been available since mid-May on the public website. Information regarding the annual report was circulated to the advisory committees, community associations, and the Saanich Community Association Network.

The Director of Planning provided an overview of the Environmental Integrity theme in the annual report and noted:

- Environmental Integrity comprises the corporate themes of sustainable environment and balanced transportation.
- Highlights from progress in 2011 include: completing the region's first climate change adaptation plan; updating the Pedestrian Priority Implementation Planning tool; and exceeding the target for sidewalk construction.

The Director of Parks and Recreation provided an overview of the Social Well-Being theme in the annual report and noted:

- Social Well-Being comprises the corporate themes of healthy community and safe community.
- Highlights from progress in 2011 include: an increase by approximately 10% of residents in the age bracket of 55 years or older leading more active lifestyles; and activating 14 additional block watch groups, exceeding the target of 10 groups.

The Director of Legislative Services provided an overview of the Economic Vibrancy theme in the annual report and noted:

- Economic Vibrancy comprises the corporate themes of vibrant, connected economy and service excellence.
- Highlights from progress in 2011 include: surveying citizens regarding the public website; spending over \$24 million to sustain community infrastructure; and completing the Tattersall Drive project.

Councillor Derman stated:

- As seen in the low attendance at tonight's meeting, the public is not engaged in the annual report process.
- Consideration should be given to incorporating the following indicators: percentage and status of wild lands and representative ecosystems; health of watersheds and initiatives to improve same; levels of congestion and average trip time; number of trips by residents using alternative transportation; and amount of separated cycling infrastructure.
- Other considerations with respect to the annual report include: incorporating a summary of initiatives; clarifying short and long term goals, especially with respect to climate change; and focusing land use decisions to provide destinations, as well as pedestrian and cycling infrastructure.

Councillor Brownoff stated:

- There is now a good mix of targets in the annual report.

- Consideration should be given to amending the indicators as follows: "number of tonnes of waste diverted/generated in Saanich per year" should be on a per household basis; and "average daily automobile traffic volume on key routes in Saanich" should be listed by individual commuter route, such as Shelbourne Street.
- Other considerations with respect to the annual report include: various means of public engagement, not only electronic; the increase in business licenses showing more businesses being opened in Saanich; the money invested by Saanich in infrastructure and replacement funding to support the economy; and the increase in trail networks, marked bicycle lanes, and public parks from 2007.

Councillor Gerrard stated:

- This is a very comprehensive document.
- The actual volunteer hours worked in 2011, a total of 7,272, are impressive and commendable.
- Without volunteers, the funding for the Gorge Canada Day Picnic and invasive species removal would be problematic.

Councillor Wergeland stated:

- The annual report is a great document, but it should not be expanded unnecessarily.
- It would be interesting to know why the January 2012 Citizen Survey showed a decrease in respondents indicating Saanich was a good or very good place to work.

In response to questions from Council, the Administrator stated that the difference in the estimated and actual amounts of asphalt, drain pipe, and water mains are a reflection of changes in priorities throughout the year.

Councillor Sanders stated:

- The annual report is an excellent and concise document.
- She has discussed the annual report with several community members, many of whom were pleased with the document.
- The document can be a challenging to read if statistics are not an area of particular interest.

Councillor Murdock stated:

- Posting the annual report on the website for over a month allowed ample time for review. He is disappointed with the lack of public response, though that may be a positive indication.
- The targets in the annual report could be sharpened.
- The strategic plan has been integrated with the Official Community Plan; consideration should be given to further integrating the financial plan.
- MOTION MOVED by Mayor Leonard and Seconded by Councillor Gerrard: "That it be recommended that Council endorse the 2011 Annual Report as presented."

CARRIED

Adjournment On a motion from Mayor Leonard, the meeting adjourned at 8:48 pm.
